One contact for all services: **SOBEGI**

PLATFORM SPECIFICATIONS

■ 15 companies on site, with a platform manager: Sobegi

Abengoa	Spain
Arkema	France
Biolacq Energies	France
Messer	France
OP system	France
Retia	France
SCI RB/SAMAT	France
SEBL	France

Sobegal	France
Sobegi	France
Sobegi Environnement	France
Soferp	France
TEPF	France
TIGF	France
Toray	Japan

■ 700 employees

■ Total area of 224 hectares, **of which 40 are available**

■ **Security:** Fenced and secured site, look-out post and security guards 24/7, Seveso-certified site (high level of security)

■ **Certifications at industrial level:** ISO 9001, ISO 14001, OHSAS 18001, MASE, COFRAC

OPERATIONS/PRODUCTS

- **H₂S - many thiochemical products - commercial gas (HUB) - ethanol**
- Sulfur chemicals - region with dense woodland and cereal crops - manufacture of carbon fibers (Toray)
- Organic and mineral chemicals - continuous process

INFRASTRUCTURE

- 20 mins from airport (Pau-Uzein), daily flights to Paris airports, and two other airports nearby Biarritz Parme and Tarbes Ossun Lourdes
- 10 mins to A65/A64/A63 motorways
- Sea access through the port of Bayonne
- Artix 5mins / Orthez 20 mins / Pau 40 mins
- Direct connection to the rail network

SHARED SERVICES/UTILITIES

5 steam boilers 4 systems from 4 to 110 bars	Steam	
	Electricity	63 kV station and 5.5/20 kV distribution system, Auto production capacity up to 34 MW
Industrial water, demineralized water Fire system water	Industrial fluids	
	Industrial gas	Compressed air, nitrogen
Wastewater treatment plant	Treatment of effluents	
	Possible connection to existing network	To the treatment plant
Medical care service, fire department Firemen specializing in chemical risk	Safety/security	
	Full service possible	Plug&Play connection, optical fiber, high-speed internet, telephone network
Analytical laboratory	Technical support functions	
	Infrastructure management	Rail traction

OTHERS SERVICES/UTILITIES

- Cooling water, ice water
- Training center, special center for security training (CESS)
- IT services are under the responsibility of each company

NETWORK PLATFORM

Local Innovation clusters	Avenia	Geosciences and oil engineering
Research centers	GRL (groupement de recherche de Lacq) Arkema Perl (Total)	Design and development of acrylic polymers, sulfur derivatives and adsorbent products Physico-chemical products, treatment of gases, Products for the environment
	TORAY Technical center	Carbon fibers
	CHEMSTART'UP	R&D and technological transfer platform, with: <ul style="list-style-type: none"> ■ a shared laboratory between TOTAL/CNRS/ESPCI (chemical engineering school) for research on physico-chemical products ■ SCE France (Hydro-Québec) for scientific research on energy storage and lithium ion batteries ■ M2I Development for research on biological materials ■ BGH for research on the treatment of gas
	CSTJF (TOTAL)	Center of expertise in the field of oil and petroleum activity
Universities	UPPA (Pau Pays Adour University)	Science and technology laboratories
	IPREM	Analytical sciences and chemistry for materials and the environment
	Bordeaux University	Science and technology laboratories
Potential partners	In this industrial area	Around 100 subcontractors and 30 other companies
